### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Derek Stettner on 1 October 2008.

The application has been amended as follows:

Claim 1 has been amended as :

(Amended) 1. A document generation system comprising:

a computer-implemented assembly facility including an XML processor configured to apply precedence and rules to document content to assemble a requested document and configured to be coupled to an origination platform;

wherein precedence involves the XML processor identifying two or more matching document components and dynamically choosing one of the matching components based on at least one of an identity of a party requesting the document and an identity of an ancestor of the party requesting the document;

**wherein the two or more matching document components each have a precedence level, and wherein the precedence level of each matching document**

**component is determined according to the depth of the matching document component in a hierarchical structure;**

a knowledge base stored in computer memory and configured to be coupled to the assembly facility and to store content in a hierarchy; and

a content management system configured to be coupled to the knowledge base and to support authoring of document content and rules.

Claim 46 has been amended as:

**46. (Canceled)**

Claim 47 has been amended as:

(Amended) 47. A document generation system as claimed in claim ~~46~~ **1**, wherein the XML processor is configured to choose one of the matching document components based on the precedence level of the matching document components.

2. The following is an examiner's statement of reasons for allowance:

Regarding amended independent claim 1, none of the references, either singularly or in combination, teach or suggest to a person of ordinary skill in the art at the time of the invention the combination of limitations of claim 1 including, "a computer-implemented assembly facility including an XML processor configured to apply precedence and rules to document content to assemble a requested document and configured to be coupled to an origination platform; wherein precedence involves the

XML processor identifying two or more matching document components and dynamically choosing one of the matching components based on at least one of an identity of a party requesting the document and an identity of an ancestor of the party requesting the document; wherein the two or more matching document components each have a precedence level, and wherein the precedence level of each matching document component is determined according to the depth of the matching document component in a hierarchical structure; a knowledge base stored in computer memory and configured to be coupled to the assembly facility and to store content in a hierarchy; and a content management system configured to be coupled to the knowledge base and to support authoring of document content and rules." together. Thus, the limitations of claim 1 are considered novel, and unobvious to a person of ordinary skill in the art at the time the invention was made in view of the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
